

RESUMES OF KEY PERSONNEL

Brian Griess

Mr. Griess currently serves as Assistant Executive Director for a 15-member California joint powers agency with support in state and federal regulatory proceedings regarding the structure and operational protocols of California's independent system operator (ISO). Reviewed the terms and conditions of the agency's existing transmission service contracts to ensure contractual obligations would co-exist with ISO protocols. Also prepared an analysis of the economic and operational impacts of the ISO on the agency's transmission contracts. Managed the review and analysis of California ISO tariff filings and operating procedures. Prepared issue papers and FERC filings to represent TANC and its members. Provide expert witness testimony for TANC in various FERC filings.

Thomas Crooks

Mr. Crooks has more than 25 years experience in the energy industry. He has performed research and evaluation of industry restructuring in other countries and states and reported to industry restructuring steering committees. His executive white papers and analyses have contributed to formulating regulated tariffs, operating rules and deregulation implementation plans. Mr. Crooks has provided consulting services to municipal electric utilities, electric distribution, transmission and generation cooperatives, statewide associations, city governments, state agencies and end-use energy customers located throughout the United States and Canada. He possesses a comprehensive knowledge of electric utility rate structures, load research, modeling and management; power procurement as well as strategic and procedural aspects of utility formation. Between 1991 and 2001 while employed at Southern California Edison, Mr. Crooks evaluated consultant proposals to local governments to form municipal electric utilities and various forms of "spot-municipalization". He provided countervailing analysis and successfully opposed the formation of electric utilities in cities, "green-field" commercial developments and at closed and/or realigned military bases. Mr. Crooks possesses extensive knowledge of investor owned utility tactics and motivation and will manage the Technical Proposal project elements.

Patrick Mealoy

Mr. Mealoy is an economist and policy planner with over ten years experience in the energy industry. His expertise includes assessing the impact of federal, state, and local regulations, as well as developing strategies related to these policies. He has extensive experience in strategic planning, market assessment, economic forecasting, and industry trend analysis. Mr. Mealoy has been involved in the electric utility restructuring process since 1993. These forums include the state regulatory commissions, FERC, power exchanges, the legislatures, and local regulatory authorities. He has also aided governmental clients in the development and implementation of strategic plans and rate designs, and has prepared filings for FERC and state public utilities commissions.

John Dalessi

John Dalessi is a Principal in Navigant Consulting's Energy Generation and Transmission practice in the Sacramento office. With more than twelve years of experience in the energy industry, John brings a wide array of experience in the areas of electricity market operations, cost of service and rate design, forecasting, demand response, industry restructuring, regulatory and legislative analysis, and strategic planning. Mr. Dalessi's diverse experience includes holding various management positions at the Automated Power Exchange, PG&E Energy Services, and Southern California Edison Company.
